

SRI MANAKULA VINAYAGAR ENGINEERING COLLEGE

(An Autonomous Institution) (Approved by AICTE, New Delhi and Affiliated to Pondicherry University) (Accredited by NAAC with 'A' Grade and Accredited by NBA-AICTE, New Delhi) Madagadipet, Puducherry

Third Meeting of the Board of Studies

Department of Computational Studies

for the Programme

Bachelor of Data Science And Analytics

Venue

First Floor, SAS Block

Sri ManakulaVinayagar Engineering College

Madagadipet, Puducherry - 605 107

Date & Time

29-11-2023 & 02.30 pm to 4.00 pm

School of Arts and Science Department of Computational Studies Board of Studies Meeting for B.Sc. Data Science and Analytics

The Third meeting of Board of Studies for the course B.Sc. Data Science and Analytics was held through online on 29.11.2023 at 02:30 pm in the Department of Computational Studies, School of Arts and Science, Sri Manakula Vinayagar Engineering College with the Head of the Department in the Chair.

The following members were present for the Third Meeting of Board of Studies.

S. No.	Name of the Member with Designation and official Address	Responsibility in the BoS
1	Dr. N. MOGANARANGAN, M.E., Ph.D. Professor & Head, Department of Computational Studies, School of Arts & Science, Sri Manakula Vinayagar Engineering College (Autonomous) Madagadipet, Puducherry 605 107 E-mail: moganarangan.cse@smvec.ac.in Mobile: 98945 33661	Chairman
2	Dr. PUNAM BEDI M.Sc., M.Tech., Ph.D. Professor, Department of Computer Science, University of Delhi, Delhi – 110 007. Email: punambedi@gmail.com , Mobile:9899125785	Pondicherry University Nominee
3	Dr. R. AROKIA PAUL RAJAN MCA, PGDBA, MA, PhD., Associate Professor, Computer Science, School of Sciences, Bangalore Central Campus, Christ University, Bangalore, Karnataka. Mail id: paulraajan@gmail.com Ph: 9443459242	Subject Expert (Academic Council Nominee)
4	Dr. M. DURAISAMY, MCA., M.Phil., Ph.D., TNSET. Associate Professor and Head, Department of Computer Applications, Government Arts and Science College, Kariyampatti, Tirupattur, Tamilnadu - 635 901. E-mail: duraimca78@gmail.com Mobile: 98431 55358.	Subject Expert (Academic Council Nominee)
5	Mr.E.IYYAPPAN, Senior Application Developer, IQVIA, Bangalore. E-mail: eiyyappan.mca@gmail.com Mobile:9790700670	Member (Industry Representative)

Co-opted Ex	pert Members	
	Dr. J. MADHUSUDANAN, ME., Ph.D.,	
6	 Professor and Head, Department of Artificial Intelligence and Data Science, Sri Manakula Vinayagar Engineering College, Madagadipet, Puducherry. 605 107. E-mail: madhu@smvec.ac.in Mobile: 9003739274 	Co-opted Expert Member
7	Mr. M. SHANMUGAM, M.Sc., M.Phil., M.E., SET, (Ph.D)., Associate Professor, Department of Computer Science Engineering, Sri Manakula Vinayagar Engineering College E-mail: shanmugam.mm@smvec.ac.in Mobile: 9444370963	Co-opted Expert Member
Internal Mer	nbers	
8	 Mrs. A. SHAMSATH BEGAM, M.C.A., Assistant Professor, Department of Computational Studies, School of Arts and Science, Sri Manakula Vinayagar Engineering College, Madagadipet, Puducherry. 605 107. E-mail: shamsathbegum.sas@smvec.ac.in, Mobile: 9500399774 	Internal Member
9	Mr. K. SANTHOSHKUMAR, M.C.A. M.Phil. B.Ed.,Assistant ProfessorDepartment of Computational StudiesSchool of Arts and ScienceSri Manakula Vinayagar Engineering CollegeMail id: santhoshkumark.sas@smvec.ac.inPhone: 8508068040.	Internal Member
10	Dr. M.A. ISHRATH JAHAN M.A., M.Phil., Ph.D.,Associate Professor & Head,Department of English,School of Arts and Science,Sri Manakula Vinayagar Engineering College, Madagadipet, Puducherry.605 107.E-mail: ishrath@smvec.ac.inMobile: 9443075126.	Internal Member
11	Mr. P.KRISHNAMOORTHY M.Sc., M.Phil.,Assistant Professor and Head,Department of mathematics,School of Arts and Science,Sri Manakula Vinayagar Engineering College, Madagadipet, Puducherry.605 107.E-mail: krishnamoorthymaths@smvec.ac.inMobile: 9750028056.	Internal Member

ANNEXURE – II

AGENDA OF THE MEETING

Item No.: BoS/2023/SAS/UG/ B.Sc. Data Science and Analytics/3.1

Welcome Address, Introduction about the Institution, Department, and BoS Members.

Item No.: BoS/2023/SAS/UG/ B.Sc. Data Science and Analytics/3.2

To review and confirm the minutes of the Second meeting of the Board of Studies held on June 30, 2023.

Item No.: BoS/2023/SAS/UG/ B.Sc. Data Science and Analytics/3.3

To discuss the curriculum and syllabi of (IV Semester) for revision and modifications if any.(R- 2020).

Item No.: BoS/2023/SAS/UG/ B.Sc. Data Science and Analytics/3.4

To discuss and approves the curriculum (I-IV semester) and syllabi (II semester) for B.Sc Data Science and analytics programme under Regulations R-2023.

Item No.: BoS/2023/SAS/UG/ B.Sc. Data Science and Analytics/3.5

To discuss and approve the Academic calendar for the even semester (semester II, IV) of Academic year 2023-24.

Item No.: BoS/2023/SAS/UG/ B.Sc. Data Science and Analytics/3.6

To Debate Admission eligibility criteria / norms to enroll as student in the specific programme as prescribed by UGC

Item No.: BoS/2023/SAS/UG/ B.Sc. Data Science and Analytics/3.7

To Conduct of Internal assessment test, model practical exams, award of internal assessment /Re Earn / Improvement / Evaluation Procedures.

Item No.: BoS/2023/SAS/UG/ B.Sc. Data Science and Analytics/3.8

To appraise and approve the Discipline Specific Elective (DSE) and Skill Enhancement course (SEC) offered to the fourth semester (R - 2020) and Second Semester (R - 2023)

Item No.: BoS/2023/SAS/UG/ B.Sc. Data Science and Analytics/3.9

To propound the Department Research activities and to inform about the remarkable achievement of the Staff and Students.

Item No.: BoS/2023/SAS/UG/ B.Sc. Data Science and Analytics/3.10

Any other item with the permission of the Chair

SCHOOL OF ARTS AND SCIENCE

ANNEXURE – I

ACADEMIC REGULATIONS 2020

(R 2020)

COLLEGE VISION AND MISSION

Vision

To be globally recognized for excellence in quality education, innovation and research for the transformation of livestoserve the society.

Mission

M1: Quality Education:

To provide comprehensive academic system that amalgamates the cutting edge technologies with bestpractices.

M2: Research and Innovation:

To foster value based research and innovation in collaboration with industries and institutions globally forcreating intellectuals with new avenues.

M3: Employability and Entrepreneurship:

To inculcate the employability and entrepreneurial skills through value and skill based training.

M4: Ethical Values:

To instill deep sense of human values by blending societal righteousness with academic professionalism for the growth of society.

DEPARTMENT OF COMPUTATIONAL STUDIES

VISION AND MISSION

Vision:

To come up with successfully as a high-quality human capital in Computer Science and related areas for thesustainable growth of the IT industry needs of the country.

Mission:

M1: Innovative Skills:

Ensuring deeper understanding of fundamentals and acquiring innovative skills within core areas of ComputerScience.

M2: Motivated Graduates:

Producing highly skilled and motivated graduates with the ability of problem solving individually and in teams.

M3: Ethical Responsibilities:

Providing a deep awareness of our ethical responsibilities to our profession and to the society.

A20GET101

GENERAL ENGLISH I (Common to B.A., B.C.A. and B.Sc.)

L	т	Ρ	С	Hrs
3	0	0	3	45

Course Objectives

- To recognize the rhythms, metrics and other musical aspects of poetry
- To read a variety of texts critically and proficiently
- To enable the students to enjoy the flair of literature through the work of great writer
- To make the students to know the functions of basic grammar and frame sentences without grammatical error
- To enable them understanding the intrinsic nuances of writing in English language

Course Outcomes

After the completion of this course, the students will be able to

- **CO1** Comprehend and discuss the various facets of selected poems.
- CO2 Analyze and interpret texts written in English.
- CO3 Read drama with graduate-level interpretive and analytical proficiency.
- **CO4** Improve the fluency and formation of grammatically correct sentence.
- CO5 Enhance the writing skills for specific purposes.

UNIT I POETRY

(9 Hrs)

- 1. John Milton: On His Blindness
- 2. William Wordsworth: Daffodils
- 3. Percy Bysshe Shelly: Ozymandias
- 4. Emily Dickinson: Because I could not stop for Death
- 5. Sarojini Naidu: The Queen's Rival

UNIT II PROSE	(9 Hrs)
1. Francis Bacon: Of Love	
2. Charles Lamb: A Dissertation upon Roast Pig	
UNIT III DRAMA	(9 Hrs)
1. Oscar Wilde: Lady Windermere's Fan	
UNIT IV GRAMMAR	(9 Hrs)
1. Parts of Speech	
2. Tenses	
3. Subject-Verb Agreement	
UNIT V COMPOSITION	(9 Hrs)
1. Essay Writing	
2. Email	

Text Books

				Р	L L	Hrs
A20DAT101	C PROGRAMMING					
		4	0	0	4	60

Course Objectives

- To study about the algorithms and draw flowcharts in a language independent manner.
- To understand how to write modular, efficient and readable C programs
- To understand the concepts of creating and using Arrays of the C data types. .
- To describe the techniques for creating program modules in C using functions. .
- To study about creation of derived data types and perform operations on files and pointers.

Course Outcomes

After completion of the course, the students will be able to

- **CO1** Develop simple applications in C using different data types.
- **CO2** Develop programs involving decision structures, loops, arrays and functions.
- CO3 Classify the difference between call by value and call by reference
- **CO4** Design and develop programs using Pointers to understand the dynamics of memory.
- **CO5** Understand the File management Operations and perform different file operations.

UNIT I INTRODUCTION TO C

Introduction to C Programming – Algorithm – Pseudo code – Flow chart – Basic Structure of C Program – Keywords and Identifiers – Data Types – Variables – Constants – Operators – Arithmetic Expressions – Type conversions - Input and Output operations.

UNIT II DECISION MAKING AND BRANCHING

Decision Making Statements: if statement, if-else, nested if-else statement, else if ladder and Switch Statement -Looping: While Loop, for loop, do-while loop – break and continue statement, go to statement.

UNIT III ARRAYS AND FUNCTIONS

Introduction to Arrays – Declaration of Array – one-dimensional array, two – dimensional array, multidimensional array – Functions: Introduction to Functions – Function Definition – Category of Functions – call by value, call by reference – Storage classes - auto, register, static, extern, arrays to functions.

UNIT IV STRING AND POINTERS

Strings - Declaring Strings - Reading and Writing strings - String Handling Functions - Pointers -Initialization of Pointer – Pointers Expressions – Pointer Arithmetic – pointers and arrays – array of pointers – pointer as function arguments - pointers to functions - Const Pointer - sizeof() operator.

UNIT V STRUCTURES, UNIONS AND FILE MANAGEMENT

C Structure – Structure Initialization – Arrays of Structures – Nested Structure – Structures and Functions – Unions - Concept of a file - File Management - input /output operations on files - Random access to file -Error handling in files.

	L	Т	
DATA STRUCTURE AND ALGORITHMS	4	0	

Course Objective

A20DAT102

- To introduce the primary data structures and algorithms for their associated operations.
- To understand the applications of data structures.
- To learn the implementation issues of the data structures introduced.
- To understand the concepts of searching and sorting Techniques.
- To understand the basic concepts of stack, queue, List, Trees and Graphs

Course Outcomes

After completion of the course, the students will be able to

CO1 – Analyze algorithms based on time and space complexity.

CO2 – Implement and Apply linear data structures to solve simple problems.

CO3 – Represent and Apply Non-linear data structures to solve complex problems.

- CO4 Use Divide and conquer method to solve various problems.
- **CO5** Use Greedy techniques to solve real time problem.

UNIT I INTRODUCTION TO DATA STRUCTURES AND ALGORITHMS

Types of data structures - Abstract Data Type (ADT) - Analysis of algorithm - Time and space complexity -Recurrence relation - Asymptotic notation. Sorting - Searching.

UNIT II LIST ADT

Static and dynamic Representation - Types -Single Linked List-Doubly Linked List - Circular Linked List -Operations and Applications.

UNIT III STACK AND QUEUE ADT

Static and Dynamic Representation – Operations - Applications- Balancing Parenthesis- Evaluation of Arithmetic Expression- Infix to Postfix conversion. Queue ADT: Static and dynamic Representation - Linear queue circular queue.

UNIT IV TREE ADT AND GRAPH ADT

Representation – Types - Binary Tree - Threaded Binary Tree - Binary Search Tree - Operation and Application. Graph: Representation — Types -Graph Traversal – Depth First Search - Breadth First Search – Application -Minimum cost spanning tree - Topological Sorting.

UNIT V ALGORITHM DESIGN TECHNIQUES

Divide and Conquer - General method - Finding Minimum Maximum - Merge Sorting - Greedy Method: General Method – knapsack problem – Single source shortest path – Dijkstras: Job sequencing.

		L	1	Р	C	Hrs
AZUDAD101	APPLIED PROBABILITY AND STATISTICS	4	0	0	4	60

Course objectives

- The concepts of discrete and continuous random variables, the probability distribution and density function.
- Evaluation of marginal and conditional distribution of multiple random variables.
- The concept of correlation and regression to find covariance.
- Evaluation of the given data for appropriate test of hypothesis.
- Analyzing the data for variance..

Course Outcomes

After completion of the course, the students will be able to

- **CO1 –** Describe the continuous random variables and moments of Discrete and continuous random variables.
- **CO2 –** Calculate probabilities and derive the marginal and conditional distribution of bivariate random variables.
- **CO3 –** Apply the concept of correlation and regression to find covariance.
- **CO4 –** Evaluate the given data for appropriate test of hypothesis.
- **CO5 –** Test the data for analysis of variance.

UNIT I SINGLE RANDOM VARIABLES

Basic definitions of probability- Random Variables – Discrete and Continuous. Probability distributions, mass function/ density function of a probability distribution, mathematical expectation, moments about origin, central moments, skewness, Kurtosis. Moment generating function of probability distribution.

UNIT II PROBABILITY DISTRIBUTIONS

Binomial, Poisson, Normal, exponential and Gamma distributions -their Properties. Moment generating functions of the above distributions and hence find the mean and variance. Joint probability distributions- Joint probability mass /density function, Marginal probability, mass / density functions.

UNIT III CORRELATION & REGRESSION SAMPLING DISTRIBUTIONS

Coefficient of correlation, the rank correlation, Covariance of two random variables. Regression Coefficient, The lines of regression and multiple correlation & regression Sampling: Definitions of population, sampling, statistic, parameter. Types of sampling, Expected values of Sample mean and variance, sampling distribution, Standard error, Sampling distribution of means and sampling distribution of variance. Parameter estimation- Point estimation and interval estimation.

UNIT IV TESTING OF HYPOTHESIS - I

Testing of hypothesis: Null hypothesis, Alternate hypothesis, Type I& Type II errors – critical region, confidence interval, Level of significance. One sided test, Two sided test. Large sample tests:

(i) Test of Equality of means of two samples, equality of sample mean and population mean (cases of known variance & unknown variance, equal and unequal variances)

(ii) Tests of significance of difference between sample S.D and population S.D.

(iii) Tests of significance difference between sample proportion and population proportion, difference between two sample proportions.

UNIT V TESTING OF HYPOTHESIS-II

Student t-distribution, its properties; Test of significance sample mean and population mean, difference between means of two small samples. Snedecor's F- distribution and its properties. Test of equality of two population variances. Chi-square distribution, its properties, Chi-square test of goodness of fit.

ENVIRONMENTAL STUDIES

(Common for all B.A., B.Sc., B.Com., B.B.A, B.C.A.)

Course Objectives

A20AET101

- To gain knowledge on the importance of natural resources and energy.
- To know the structure and function of an ecosystem
- To imbibe an aesthetic value with respect to biodiversity, understand the threats and its conservation and appreciate the concept of interdependence
- To know the causes of types of pollution and disaster management
- To observe and discover the surrounding environment through field work.

Course Outcomes

After completion of the course, the students will be able to

- CO1 Understand about the various resources
- CO2 Learn about the biodiversity
- CO3 Learn the different types of pollution and to prevent the pollution
- **CO4** Know about the pollution Act
- CO5 Observe various environmental issues in surroundings

UNIT I INTRODUCTION TO ENVIRONMENTAL SCIENCES: NATURAL RESOURCES (6 Hrs)

Environmental Sciences - Relevance - Significance - Public awareness - Forest resources - Water resources - Mineral resources - Food resources - conflicts over resource sharing - Exploitation - Land use pattern - Environmental impact -fertilizer - Pesticide Problems - case studies.

UNIT II ECOSYSTEM, BIODIVERSITY AND ITS CONSERVATION

Ecosystem - concept - structure and function - producers, consumers and decomposers - Food chain - Food web - Ecological pyramids - Energy flow - Forest, Grassland, desert and aquatic ecosystem. Biodiversity - Definition - genetic, species and ecosystem diversity - Values and uses of biodiversity - biodiversity at global, national (India) and local levels - Hotspots, threats to biodiversity - conservation of biodiversity – Insitu & Exsitu.

UNIT III ENVIRONMENTAL POLLUTION AND MANAGEMENT

Environmental Pollution - Causes - Effects and control measures of Air, Water, Marine, soil, solid waste, Thermal, Nuclear pollution and Disaster Management - Floods, Earth quake, Cyclone and Landslides. Role of individuals in prevention of pollution - pollution case studies.

UNIT IV SOCIAL ISSUES - HUMAN POPULATION

Urban issues - Energy - water conservation - Environmental Ethics - Global warming - Resettlement and Rehabilitation issues - Environmental legislations - Environmental production Act. 1986 - Air, Water, Wildlife and forest conservation Act - Population growth and Explosion - Human rights and Value Education - Environmental Health - HIV/AIDS - Role of IT in Environment and Human Health - Women and child welfare - Public awareness - Case studies.

UNIT V FIELD WORK

Visit to a local area / local polluted site / local simple ecosystem - Report submission REFERENCES

C PROGRAMMING LAB

L T P C Hrs 0 0 4 2 30

Course Objectives

- To familiarize with C programming constructs.
- To develop programs in C using basic constructs.
- To develop programs in C using arrays.
- To develop applications in C using strings, pointers, functions.
- To develop applications in C using structures.
- To develop applications in C using file processing.

Course Outcomes

After completion of the course, the students will be able to

- **CO1** Apply the various basic programming constructs.
- CO2 Develop C programs for simple applications making use of basic constructs, arrays and strings.
- CO3 Develop C programs involving function.
- **CO4** Design applications using pointers, and structure.
- CO5 Apply concept of file management.

List of Exercises

- 1. Write a program to initialize, assignment & printing variables of different data types.
- 2. Write a program to demonstrate arithmetic operators and logical operators.
- 3. Write a Program to read marks of students in five subjects and print results using decision statements.
- 4. Write a program to print prime numbers in the given range.
- 5. Write a program to print minimum and maximum elements using 1D array.
- 6. Write a program to perform matrix addition and matrix subtraction using 2D array.
- 7. Write a program to verify the given string is palindrome or not.
- 8. Write a program to find product of two numbers using functions with arguments, with return type.
- 9. Develop program to illustrate pointers and Structure.
- 10. Develop programs for file operations.

A20DAL102 DATA STRUCTURE AND ALGORITHMS LAB

0 4 2 30

Course Objectives

- Ability to identify the appropriate data structure for given problem.
- To learn about the concepts of Searching and Sorting.
- Identify suitable data structure to solve various computing problems
- To study about the linear and non-linear Data Structures.
- To learn about the concepts of ADT including List, stack and Queues

Course Outcomes

After completion of the course, the students will be able to

- **CO1** Use appropriate data structure for given problem.
- CO2 Solve the given problem by identifying the appropriate Data Structure.
- CO3 Solve problems in linear and non-linear Data Structures.
- CO4 Develop programs using various searching methods.
- **CO5** Sole the problems using Linked List.

List of Exercises

- 1. Write programs for implementing Linear searching techniques to arrange a list.
- 2. Write programs for implementing Bubble sort sorting techniques to arrange a list.
- 3. Design and implement Stack and its operations using List.
- 4. Design and implement Queue and its operations using List.
- 5. Uses Stack operations to convert infix expression into postfix expression.
- 6. Write programs for the following operations on Single Linked List.
- (i) Creation (ii) insertion (iii) deletion (iv) traversal
- Write programs for the following operations on Circular Linked List.
 (i) Creation (ii) insertion (iii) deletion (iv) traversal
- 8. Write a Python program to implement Stack using linked list.
- 9. Write a program to perform the following operation using binary search tree:
 - (i). Create a binary search tree.
 - (ii). Traverse the above binary search tree recursively in pre-order, post-order and in-order.
 - (iii). Count the number of nodes in the binary search tree.
- 10. Write programs to implement the following graph traversal algorithms using depth first search.

COMMUNICATION SKILLS LAB

L	Т	Ρ	С	Hrs
0	0	4	2	30

(Common to B.A., B.Sc., B.Com., B.B.A.& B.C.A.)

Course Objectives

- To improve the students' speed in reading.
- To decode the correspondence between sound and spelling in English.
- To train students to organize, revise and edit ideas to write clearly and effectively.
- To enhance the sense of social responsibility and accountability of the students.
- To expound the significance of time and stress management.

Course Outcomes

After the completion of the course, the students will be able to

CO1 – Understand the pattern to communicate effectively.

- CO2 Impart Speaking skills with confidence.
- CO3 Use writing strategies to improve their drafting skills and comprehending of articles.
- CO4 Demonstrate leadership qualities to Participate in Group Discussion and Interview efficiently.
- CO5 Expertise in Managerial skills.

UNIT I COMMUNICATION SKILLS SPEAKING

Aspects of speaking - Process and techniques of effective speech – Presentations - topic to be given to students forshort speech.

UNIT II SELF - MANAGEMENT SKILLS (6 Hrs)

Time Management - Stress management – Perseverance – Resilience - Mind mapping –Self- confidence

UNIT III COMMUNICATION SKILL – READING

Phonics – Self-Introduction – Vocabulary – Comprehension - skimming and scanning.

UNIT IV SOCIAL SKILLS

Negotiation and Persuasion – Leadership – Teamwork – Problem solving – Empathy – Decision making.

UNIT V COMMUNICATION SKILL – WRITING

Descriptive - Narrative - Persuasive - Expository - Picture composition

		L	т	Ρ	С	Hrs
A20GFT202	GENERAL ENGLISH- II	3	0	0	3	45
	(Common to B.A, B.Sc. and BCA)	•	•	·	•	
Course Objectives						
 To recognize poetry 	from a variety of cultures, languages and histor	ic periods				
 To develop the inten 	sive study of language by critical reading					
• To identify the v	arious genres and analyze the works of writers	in English				
To expand the basic	understanding of targeted grammatical structur	res				
• To understand the co	onventions of writing in English					
Course Outcomes						
After the completion	on of this course, the students will be able t	to				
CO1 – Understand and	appreciate poetry as a literary art form.					
CO2 – Comprehend and	a recognize relationship between ideas, events characters and their conflicts, dilemmas and ex	and facts.	snons	e to	storio	2
CO4 – Apply grammatic	al structures meaningfully and appropriately in	oral and writ	ten fo	rm.	310110.	
CO5 – Write effectively	and coherently.					
UNIT I POETRY					(9	Hrs)
1. Lord Byron: She Walks	in Beauty				•	,
2. Robert Frost: Stopping	by Woods on a Snowy Evening					
3. Nissim Ezekiel: Night o	f the Scorpion					
4. Rabindranath Tagore:	Where the Mind is Without Fear					
UNIT II PROSE					(9	Hrs)
1. Ernest Hemingway-A D	ay's Wait					
2. Anton Chekhov: The Lo	ttery Ticket					
UNIT III FICTION					(9	Hrs)
1. Jane Austen - Pride an	d Prejudice					
UNIT IV GRAMMAR					(9	Hrs)
1. Voice – Conditionals	- Coherence					
UNIT V COMPOSITIC)N				(9	Hrs)
1. Letter Writing						

2. Report Writing

C++ PROGRAMMING

L T P C Hrs

4 0 0 4 60

Course Objectives

- To understand the Fundamentals of Computers and introduction to C++ language.
- To study about functions in C++.
- To understand the Class and Objects.
- To understand the constructor and operator overloading
- To study about Inheritance and Files.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Describing the basic introduction about C++ programming.

CO2 – Incorporating the use of functions.

CO3 - Develop the programming structure using class and objects.

CO4 - Design and develop programs using constructor and operator overloading.

CO5- Understand the File management concepts.

UNIT I BASICS OF C++

(12 Hrs)

Introduction to OOP – Basics components of C++ - Program and program Structure – Compiling and Executing C++ program – Difference between Procedural Oriented Language and Object Oriented Language – Benefits of OOP – Applications of OOP.

UNIT II FUNCTIONS

12 Hrs)

Main Function – Function Prototyping – Call by Reference – Return by Reference – Inline Function – Default Arguments – Constant Arguments – Function Overloading – Friend Function – Virtual Function – Math Function – Library Function.

UNIT III CLASS AND OBJECTS

12 Hrs)

Introduction – Specifying a Class – Defining Member Function – Nesting of Member Function – Private Member Function – Arrays within a Class – Memory Allocation for Objects – Static Data Members – Arrays of Objects – Objects as Function Arguments.

UNIT IV CONSTRUCTOR AND OPERATOR OVERLOADING

12 Hrs)

Introduction – Constructor – Parameterised Constructor – Multiple Constructor in a Class – Constructor with Defau;t Arguments – Copy Constructor – Dynamic Constructor – Destructor – Operator Overloading – Unary Operators – Binary Operators – Type Conversions – Concept of Exception Handling.

UNIT V INHERITANCE, POLYMORPHISM AND POINTERS

12 Hrs)

(

(

(

(

Introduction to Inheritance – Types of Inheritance – Abstract Class – Introduction to Pointers -Pointers to Objects – this Pointer – Pointers to Derived Classes – C++ Stream Classes – Working with Files – Opening and Closing Files – Detecting End of File – Template – Class Template and Function Template.

Δ20ΠΔΤ204	INTRODUCTION OF BIG DATA	L	Т	Р	С	Hrs
		4	0	0	4	60

Course Objectives

- To understand the Fundamentals of Big Data.
- To study the basic terminologies of C language and arrays
- To understand the Functions, Structures and Unions.
- To understand the concepts of Pointers.
- To study about File Management Operations in C.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Describing the basic introduction about Big Data.

CO2 - Incorporating the use of sequential, selection and repetition control structures into a program.

CO3 - Develop the concepts of looping and arrays.

CO4 - Design and develop programs using Functions and Pointers.

CO5- Understand the File management Operations and Pre-processor Directives.

UNIT I INTRODUCTION TO BIG DATA

Introduction - Distributed File System - Big Data and its importance - Characteristics of Big data - Limitation of Conventional Data Processing - Need of big data frameworks - Big data analytics - Limitations of Big Data and Challenges - Big data applications.

UNIT II HADOOP

Basic concepts of Hadoop and its features – The Hadoop Distributed File System(HDFS) – Anatomy of Hadoop Cluster and its Modes – Hadoop Architecture – Hadoop Storage – Hadoop Daemons – Interacting HDFS using commend-line – HDFS using Java – Data Flow – Blocks – YARN.

UNIT III DATA COLLECTION AND TRANSMISSION

Big data collection - Strategies - types of data sources - collection Methods - Log files - sensors - Method for acquiring network data - Specialized network monitoring software - Mobile Equipment - Transmission methodsissues

UNIT IV HIVE

Introduction - Hive features - Hive architecture - Hive Meta store - Hive data types - Hive Tables - Table types -Creating database, Altering Database, Create table, Alter table, Drop Table, Built-in Functions - Built-in Operators, User **Defined Functions.**

UNIT V BIG DATA PRIVACY AND APPLICATIONS

Data Masking – Privately identified Information (PII) – Privacy Preservation in Big Data – Popular Big Data Techniques and tools – Applications – Social Media Analytics Fraud Detection

С Hrs . Т Ρ STATISTICS FOR DATA SCIENCE A20DAD202 0 0 4 60 Course Objectives To understand the basic descriptive statistics. • To study about the hypothesis testing. • To understand the Bayesian Inference and Functions. To understand the concepts of Regression and Probability. To study about Frequentist Inferences. Course Outcomes After completion of the course, the students will be able to **CO1** – Describing the basic descriptive statistics. CO2 - Incorporating the use of hypothesis testing. **CO3** - Develop the concepts of Bayesian Inference and Functions. CO4 – Understand the concept of Regression and Probability. CO5- Understand the concept of Frequentist Inferences. UNIT I PRACTICAL STATISTICS (12 Hrs) Data Structures - Stack, Queue, Graph - Descriptive Statistics - Histogram, Sample mean and Variance, Order Statistics, Sample Covariance - Probability- random Variable, Random Vectors, Random Processes -Machine Learning – Data Preprocessing, Supervised Learning, Unsupervised Learning. UNIT II THINK STATISTICS (12 Hrs) Statistical Thinking – Process Thinking, Uncertainty – Distributions – Binomial Distribution, Normal Distribution, Poison Distribution - Hypothesis Testing- Data Collection, Null hypothesis, Alternate hypothesis, - Correlation-Pearson, Linear, Sample UNIT III BAYESIAN METHODS (12 Hrs) Bayesian Inference – Bayesian parametric models, Conjugate prior, Bayesian estimators - Loss Functions – Regression Models, Classification Models. UNIT IV STATISTICS IN PLAIN ENGLISH (12 Hrs) Regression - Linear Relationship, Independence, Normality - Factor analysis - Dimension Reduction, Extraction UNIT V COMPUTER AGE STATISTICAL INFERENCE (12 Hrs) Frequentist Inferences – P-values, Confidence Intervals, Hypothesis Testing - Large Scale Hypothesis – Probability Values and Statistical Significance- Deep Learning - decision trees, sets of rules, instances, graphical models. Text Books 1. Peter Bruce and Andrew Bruce "Practical Statistics for Data Scientists", O'Reilly Publications 2. Allen B.Downey," Think Stats" O'Reilly Publications

3. Cameron Davidson , Pilon , " Bayesian Methods for Hackers " .

	PUBLIC ADMINISTRATION	L	т	Ρ	С	Hrs
A20AET202	(Common to B.A., B.Sc., B.Com.B.B.A. and B.C.A.)	2	0	0	2	30

(Compulsory Course designed as per the directions issued by Government of India, MHRD, Department of Higher Education (Central University Bureau) F.No.19-6.2014-Desk U Dated 19-05-2014)

Course Objectives

- To introduce the elements of public administration
- To help the students obtain a suitable conceptual perspective of public administration
- To introduce them the growth of institution devices to meet the need of changing times
- To instill and emphasize the need of ethical seriousness in contemporary Indian Public Administration

Course Outcomes

After completion of the course, the students will be able to

- CO1 Understand the concepts and evolution of Public Administration.
- CO2 Be aware of what is happening in the Public Administration in the country.
- CO3 Explain the Territory Administration in the State and the Centre.
- **CO4** Appreciate emerging issues in Indian Public Administration.
- UNIT I INTRODUCTION TO PUBLIC ADMINISTRATION

(7 Hrs)

(8 Hrs)

Meaning, nature and Scope of Public Administration and its relationship with other disciplines- Evolution of Public Administration as a discipline – Woodrow Wilson, Henry Fayol, Max Weber and others - Evolution of Public Administration in India – Arthashastra – Colonial Administration upto 1947

UNIT II PUBLIC ADMINISTRATION IN INDIA

Enactment of Indian Constitution - Union Government – The Cabinet – Central Secretariat – All India Services – Training of Civil Servants – UPSC – Niti Ayog – Statutory Bodies: The Central Vigilance Commission – CBI - National Human Rights Commission – National Women's Commission – CAG.

UNIT III STATE AND UNION TERRITORY ADMINISTRATION (8 Hrs)

Differential Administrative systems in Union Territories compared to States Organization of Secretariat: -Position of Chief Secretary, Functions and Structure of Departments, Directorates – Ministry of Home Affairs supervision of Union Territory Administration – Position of Lt. Governor in UT – Government of Union Territories Act 1963 – Changing trend in UT Administration in Puducherry and Andaman and Nicobar Island

UNIT IV EMERGING ISSUES IN INDIAN PUBLIC ADMINISTRATION (7 Hrs) Changing Role of District Collector – Civil Servants – Politicians relationship – Citizens Charter - Public Grievance Redressal mechanisms — The RTI Act 2005 – Social Auditing and Decentralization – Public Private partnership.

C++ PROGRAMMING LAB

Course Objectives

- To understand the Fundamentals of Computers and introduction to C++ language.
- To study about functions in C++.
- To understand the Class and Objects.
- To understand the constructor and operator overloading
- To study about Inheritance and Files.

Course Outcomes

After completion of the course, the students will be able to

- **CO1** Describing the basic introduction about C++ programming.
- CO2 Incorporating the use of functions.
- **CO3** Develop the programming structure using class and objects.
- CO4 Design and develop programs using constructor and operator overloading.
- CO5- Understand the File management concepts.

List of Exercises

Write C++ Programs for the followings:

- 1. Implementation of Basic OOPS concepts.
- 2. Implementation of Student mark List preparation.
- 3. Implementation of Function Overloading.
- 4. Implementation of Friend Function.
- 5. Implementation of Class and Objects.
- 6. Implementation of Arrays of Objects.
- 7. Implementation of Constructor and Destructor.
- 8. Implementation of Operator Overloading.
- 9. Implementation of Exception Handling.
- 10. Implementation of Inheritance.
- 11. Implementation of Pointer.
- 12. Implementation of File Concepts.

BIG DATA ANAYTICS LAB

L T P C Hrs

0 0 4 2 30

Course Objectives

- To understand the Fundamentals of Big Data.
- To study the basic terminologies of C language and arrays
- To understand the Functions, Structures and Unions.
- To understand the concepts of Pointers.
- To study about File Management Operations in C.

Course Outcomes

After completion of the course, the students will be able to

CO1 – Describing the basic introduction about Big Data.

- CO2 Incorporating the use of sequential, selection and repetition control structures into a program.
- CO3 Develop the concepts of looping and arrays.
- CO4 Design and develop programs using Functions and Pointers.

C05- Understand the File management Operations and Pre-processor Directives.

List of Exercises

- 1. Downloading and installing Hadoop; Understanding different Hadoop modes. Start-up scripts, Configuration files.
- 2. Hadoop Implementation of file management tasks, such as Adding files and directories, Retrieving files and Deleting files
- 3. Implement of Matrix Multiplication with Hadoop Map Reduce
- 4. Run a basic Word Count Map Reduce program to understand Map Reduce Paradigm.
- 5. Implementation of K-means clustering using Map Reduce
- 6. Installation of Hive along with practice examples.
- 7. Installation of HBase, Installing thrift along with Practice examples
- 8. Patrice importing and exporting data from various data bases .

A20DAS303

BUSINESS STATISTICS

Course Objectives

- To understand the fundamentals of business statistics.
- To be conversant with the computation of measures of descriptive statistics
- To understand the concept of correlation and regression and their application in business.
- To be familiar with the relevance and need of the index number in measuring economic changes.
- To understand the importance and model of time series.

Course Outcomes

After completion of the course, the students will be able to

- CO1 Explain the concept of statistics and methods of data collection.
- CO2 Solve problems related to central tendency and measures of dispersion.
- **CO3** Demonstrate the Application of correlation and regression analysis.
- CO4 Apply the index number techniques in business.
- **CO5** Conduct Time Series Analysis.

UNIT I INTRODUCTION

Statistics - Meaning and scope of business statistics - Roles of statistics for Business Decisions - importance – Limitations - Type and collection of data - Classification and Tabulation of Data - Diagrammatic Representation of data – Types of Charts - Graphical representation of data.

UNIT II MEASURES OF CENTRAL TENDENCY (6 Hrs) Frequency distribution - Measures of central Tendency - Measure of Dispersion – Co-efficient of variation – Skewness - Pearson's coefficient of skewness- Bowley's coefficient of skewness.

UNIT III CORRELATION AND REGRESSION ANAYSIS

Karl Pearson's co-efficient of correlation, spearman's rank correlation coefficient, Regression analysis: simple regression equations.

UNIT IV INDEX NUMBERS

Index number – problems in the construction of index numbers – methods of constructing index numbers – simple and weighted index numbers – Laspeyre's , Paasche's , Bowley's and Fisher's Index Number.

UNIT V TIME SERIES ANALYSIS

Time Series – Importance – Components: Secular Trends, Seasonal Variations, Cyclical Fluctuations, Irregular Variations – Models of Time Series: Free-hand, Semi-Average, Moving Average, and Fitting Mathematical Curve methods.

A20EAL201	NATIONAL SERVICE SCHEME	L	Т	Ρ	С	Hrs
	(Common to all B.A., B.Sc., B.Com., B.B.A., B.C.A.)	0	0	2	1	30

Course Objectives

- To introduce about various activities carried out by national service scheme.
- To gain life skills through community service.
- To gain awareness about various service activities performed in higher educational institutions.
- To give exposure about the use of technology to uplift the living standards of rural community.
- To induce the feeling of oneness through harmony of self and society.

Course Outcomes

After the end of the course, the students will able to

- **CO1** Recognize the importance of national service in community development.
- **CO2** Convert existing skills into socially relevant life skills.
- **CO3** Differentiate various schemes provided by the government for the social development.
- **CO4** Identify the relevant technology to solve the problems of rural community.
- **CO5** Associate the importance harmony of nation with long term development.

UNIT I INTRODUCTION TO NATIONAL SERVICE SCHEME

(6 Hrs)

History and objectives, NSS symbol, Regular activities, Special camping activities, Village adaptation programme, Days of National and International Importance, Hierarchy of NSS unit in college. Social survey method and Data Analysis. NSS awards and recognition. Importance of Awareness about Environment, Health, Safety, Genderissues, Government schemes for social development and inclusion policy etc.,

UNIT II LIFE SKILLS AND SERVICE LEARNING OF VOLUNTEER

Communication and rapport building, problem solving, critical thinking, effective communication skills, decisionmaking, creative thinking, interpersonal relationship skills, self- awareness building skills, empathy, coping with stress and coping with emotions. Understanding the concept and application of core skills in social work practice, Team work, Leadership, Event organizing, resource planning and management, time management, gender equality, understanding rural community and channelizing the power of youth.

UNIT III EXTENSION ACTIVITIES FOR HIGHER EDUCATIONAL INSTITUTIONS (6 Hrs)

Objective and functions of Red Ribbon Club, Swatchh Bharath Abhiyan, Unnat Bharat Abhiyan, Jal Shakthi Abhiyan, Road Safety Club, Environmental club and Electoral literacy club.

UNIT IV USE OF TECHNOLOGY IN SOLVING ISSUES OF RURAL INDIA (6 Hrs)

Understanding community issues, economic development through technological development. Selection of appropriate technology, Understanding issues in agriculture, fishing, artisans, domestic animals, health and environment.

UNIT V NATIONAL INTEGRATION AND COMMUNAL HARMONY (6 Hrs)

The role of Youth organizations in national integration, NGOs, Diversity of Indian Nation, Importance of National integration communal harmony for the development of nation, Indian Constitution, Building Ethical human Relationships, Universal Human Values, Harmony of self and Harmony of nation.
