1. PREAMBLE

Higher education in the 21st century is accomplished with lot of strength, opportunities and challenges. Internet supports, technological developments, growth of interdisciplinary knowledge, general interest towards graduate programmes, support from Regulatory Agencies and Government and continuous up gradation in school curricula throw opportunities for the sustained development of higher education in the current era. At the same time, grabbing the attention of the students, keeping them in learning mode, engaging them with due responsibilities have challenges - especially due to rampant growth of technology, and quicker adaptation towards it. All these things lead to the necessity of making the curriculum robust, state-of-art, modern, futuristic, student-self-exploration- centric and ensuring student-engagement for co-creation and teamwork.

There is a greater need to synchronize the skills and knowledge of the graduates of higher education and align them to the industry needs and social advancements. Industries, instead of hiring generalists and train them, started demanding specific skills that are needed in various domains and expect the graduates to possess them on entry. This development in the expectations of the industry and job-providers changed the landscape of the graduate programmes drastically, and there is an urgent need to inculcate employability skills and practical components in every programme as such. Accreditation bodies such as National Assessment and Accreditation Council and the Regulatory Authorities like University Grants Commission focus more on “Outcome Based Education” which necessitates the student-centric approach in teaching-learning as well as assessment and evaluation. The wide spectrum of knowledge-tools that are available today also induces paradigm shifts in pedagogies. There is a greater need to in- build technology tools and online learning as part of the teaching-learning in the current context of higher education. Also, there is a necessity to orient the students to the real-world practices through various co-curricular activities. Furthermore, in order to inculcate ethical and social values in the students, there is a requirement for incorporating community development, environmental education, knowledge on Indian Constitution, Human Rights education, etc. as part of their graduate learning.

The regulations and curricula for the post graduate programmes leading to M.A. (Master of Arts), M.Sc. (Master of Science) and M.Com. (Master of Commerce) degrees incorporate all the above-stated values, principles and goals in them.

ACADEMIC REGULATIONS – POST GRADUATION PROGRAMMES

4.2 AGE LIMIT FOR ADMISSION

The norms for admission, eligibility criteria such as marks, physical fitness and mode of admission will be as prescribed by the university from time to time. The upper age limit for admission to PG programmes governed by these regulations will be 25 (twenty-five) years as on 1st July every year. However, a relaxation of 3 years beyond 25 years is permitted for differently abled / SC / ST / OBC / MBC candidates and women candidates.

5. ACADEMIC STRUCTURE AND CURRICULA FRAMEWORK

5.3 Curricula Framework

The significance of the framework of the curriculum determines the limits within which the programme operates. It also specifies the mandatory requirements in terms of credits to be earned by a student to obtain the specified degree. Since this regulation deals with varied number of postgraduate programmes in Arts, Commerce, and Science domains, the curricula of all these courses would be referred accordingly.

5.4 Category of Courses and its Credit Distribution

Course work is measured in units called credit hours or simply credits. The number of hours of a course per week is the number of credits for that course. One credit per lecture/tutorial hour per week is assigned for each theory course. Laboratory courses are assigned for an hour with 0.5 credits per week. The credit detail of a course and semester is shown in Table 3.

8. ASSESSMENT PROCEDURES FOR AWARDING MARKS

- The total marks for each course generally (Theory, Practical, Project Work) will be 100, comprising of two components namely Continuous Assessment Marks (CAM) and End Semester Examination Marks (ESM). However, there could be one credit courses, add-on courses, online certification courses and Mandatory courses that have only continuous assessment of 100 marks without an End-Semester Examination.
- The Department Consultative Committee (DCC) has to approve such courses for every semester. The scheme of assessment may also be decided by the faculty handling the course concerned with the approval from DCC and shall be made available to the students during the course registration.
